

Meet some of your neighbors ...

With at least 125 acres of our 665 acre property left untouched, owners and guests will be able to fully enjoy the essence of a Costa Rican rainforest experience. Our private nature preserve contains magnificent waterfalls, naturally created ponds, bustling streams and three springs bubbling out crystal clear water from deep within the earth providing life to countless varieties of birds, animals, trees, plants, flowers and every other form of life which makes up the rainforest.

Enjoy our photos of just some of the animals and birds that call Hacienda Matapalo home. You'll see sloths, white-faced monkeys (Capuchin), howler monkeys, toucans, parrots, macaws, egrets, kingfishers, hawks, clay-colored robins (Costa Rica's national bird), red-eyed tree frogs, green dart frogs, Iguanas, tapirs, peccary, white-tailed deer, coatis, tapezcuintle...and so much more.

you'll be seeing a lot of them!
